Twenty-two-tool MCP bridge over Microsoft Graph for Outlook mail, calendar, and contacts — read-only by default, explicit opt-in to mutate.

Top outcomes

Inbox safety

Baseline: Exposed — agent had free reign

Isolated — broker mediates every call

Agent context coverage

Baseline: About 30% (manual calendar and mail lookups)

About 95% (MCP-mediated access to the full graph)

Audit chain

Baseline: Opaque — no record of which calls fired

Per-call intent log, replayable
